

# SUPPLY CHAIN FINANCE

## 12 HOURS OF ONLINE TRAINING

This 12 hour online training course will provide you with a detailed understanding of the market trends in Supply Chain Finance and the recognised SCF techniques/programmes that can be put in practice, locally and internationally to support sellers and buyers along the supply chain. Supply Chain Finance Programmes can help lower costs, improve financial efficiencies and provide stability for the parties involved in trade transactions. Supply Chain Finance includes a broad range of established and evolving practices and techniques for the provision of finance and the management of risk across parties in a supply chain.

## CONTENT OVERVIEW

The course contains four key modules with an assessment at the end of the course to test your understanding of the training material. Each SCF technique lesson will include a workflow demonstrating the flows within the SCF programme, the parties, the benefits and contracts involved, as well as the security, risk and risk mitigation tools used.
